QUESTÃO 01 //

TEXTO I

Over 6mmt of soybean sales in just one month in Brazil.

The demand for soybean is still strong in Brazil. Farmers from the state of Mato Grosso alone had sold 5.9 million metric tons just in May, according to numbers from the Mato Grosso Institute of Agricultural Economics (Imea). Of those, nearly 2.5 million metric tons are from the current crop and 3.5 million metric tons anticipated from 2016/2017 season. Prices are still favorable in June.

Exports, on the other hand, did not have a so positive result. They reduced to 3.19 million metric tons in the month of May, but do not revert a scenario of more international demand than last year. From January to May, about 1.0.5 million tons of soybeans originated in Mato Grosso were exported – 54 percent more than in the same months of 2015.

- (A) were finishing an activity.
- (B) interrupted her many times.
- (C) did not know English.
- (D) heard the bell rang.
- (E) gave her the correct answer.

QUESTÃO 06

TEXTO VI

Uber is about to start charging people who keep drivers waiting

From Tuesday, an option to tip drivers will appear in the Uber smartphone app and will also apply to the firm's food delivery service, UberEATS. The firm's UK regional general manager Jo Bertram said the decision to introduce tipping had come after **consultation with the firm's drivers**.

Uber also confirmed that from August 22, new waiting time charges will apply to users who keep drivers waiting at the start of a journey.

- (A) mustn't.
- (B) wasn't supposed to.
- (C) shouldn't.
- (D) might not.
- (E) am not able to.

QUESTÃO 08

TEXTO VIII

United 93

Paul Greengrass's account of how a single group of passengers, almost certain of death, decided on the morning of September 11, 2001, to fight back against hijackers on a suicide mission turns out to be – after much public anxiety about potential “exploitation” – an example of a hundred per cent professional filmmaking. Greengrass's movie is tightly wrapped, unrelenting, and, no matter how exciting, superbly precise. For this story of semi-anonymous group heroism, he uses actual professionals (pilots, flight attendants, an air-traffic controller) mixed in with largely unknown actors, and avoids visual or verbal rhetoric.

The handheld camera is an active participant in everything that's going on – and still manages to see what it needs to see out of the corner of its eye. The avoidance of front-and-center staging makes us feel the uncertainty of an unprecedented situation. This is true existential filmmaking; in the end, the viewer's dread is released in mad exhilaration as the passengers charge the hijackers with the force of water breaking through a dam.

(Adapted from The New Yorker.)

A palavra *movie* é sinônima de

- (A) action.
- (B) thriller.
- (C) film.
- (D) drama.
- (E) comedy.

QUESTÃO 09

TEXTO IX

About swine flu

Swine flu is the common name given to a new strain of influenza (flu). It is called swine flu because it is thought to have originated in pigs, but this is not certain.

The most common symptoms are a fever, sore throat, diarrhea, headache, feeling generally unwell and a dry cough. In other words, the symptoms are very similar

to seasonal (regular) flu. Most people recover within a week, even without special treatment.

Pandemic

The virus was first identified in Mexico in April 2009. It has since become a pandemic, which means it has spread around the globe. It has spread quickly because it is a new type of flu virus that few, if any, people have full resistance to.

Flu pandemics are a natural event that occur from time to time. Last century, there were flu pandemics in 1918, 1957 and 1968, when millions of people died across the world.

In most cases the virus has proved relatively mild. However, around the world more than 1,700 people have died and it is not yet clear how big a risk the virus is. For this reason, and because all viruses can mutate to become more potent (stronger), scientists are saying we need to be careful.

High-risk groups

Some people are more at risk of complications if they catch swine flu, and need to start taking antivirus as soon as it is confirmed that they have the illness. Doctors may advise some high-risk patients to take antivirus before they have symptoms, if someone close to them has swine flu.

People at risk are:

- patients who have had drug treatment for asthma in the past three years,
- pregnant women,
- people aged 65 and over, and
- children under five.

To stop the virus spreading

The most important way is to have good respiratory and hand hygiene. In other words, always sneeze in to a tissue, and quickly put it in a bin. Wash your hands and home and work surfaces regularly and thoroughly to kill the virus.

<http://www.nhs.uk/conditions/pandemic-flu/Pages/Introduction.aspx>

“*pregnant women*” means

- (A) mulheres pragmáticas.
- (B) mulheres preparadas.
- (C) mulheres com crianças de colo.
- (D) mulheres grávidas.
- (E) mulheres imunes ao vírus.
