Read the text below and answer the questions:

Robots that feel?

Futurologists predict that many homes will have robots in the future. Robots already do many things such as building cars and vacuuming floors. But scientists today is starting to build friendlier, more intelligent robots – one that people will feel more comfortable having around in the house.

Sociable robots will be able to show feelings with their faces, just like humans. They will smile and frown, make eye contact, and speak. These robots will do work around the house such as cooking and cleaning. They will even take care of children and the elderly.
