GERÊNCIA DE PRODUÇÃO DE MATERIAL PARA O ENSINO MÉDIO

SEDUC EM AÇÃO 2021

LISTA DE ATIVIDADES

1ª SÉRIE – ENSINO MÉDIO

SEMANA 32

➤ Componentes Curriculares e temas

• Segunda-feira – 18/10/2021

- Inglês – Aula na TBC – Verbos modais: *should, must, have to, may e might*

2021

LINGUA ESTRANGEIRA MODERNA/INGLÊS

EIXO TEMÁTICO

➤ Verbos modais: *should, must, have to, may e might*.

HABILIDADE

➤ Identificar uso dos verbos *should, must, have to, may e might*, para empregá-los em situações comunicativas, indicando recomendação, necessidade ou obrigação e probabilidade.

Para essa aula é importante:

- assistir às videoaulas.

<https://portal.educacao.go.gov.br>
Acesso em: 08 ago. 2021.

- verbos *should, must, have to, may e might*.
Disponível em:
<http://gg.gg/vnbx0>
Acesso em: 08 ago. 2021.

- Com o auxílio das pesquisas, procurem responder às atividades propostas.

(FIEB-SP/2016-adaptada) Leia o texto, a seguir, e responda as atividades 01, 02 e 03.

It is possible to connect a number of computers and other electronic devices to create a computer network. The computers and devices which are part of the network can “talk” to each other and exchange information. In addition to the computers and devices which are connected, other devices are often needed for the network to work correctly. Examples for such devices include hubs and switches. Different kinds of network can be connected to each other with a router. Firewalls are commonly used to protect the network. In general, networks that use cables to connect can operate at higher speeds than those using wireless technology.

A Local Area Network (LAN) connects computers which are close together. Building a LAN is easier than connecting different networks by a Wide Area Network (WAN). The largest Wide Area Network is the Internet. Computers can be part of several different networks. Networks can also be part of bigger networks. The local area network in a regional office or store is usually connected to the main corporate network. These connections may allow access to the Internet, for example to show computers in a store, display its catalogue through a web server, or convert received orders into shipping instructions.

A network must be connected with appropriate hardware. This can be wired or wireless. For a simple LAN, computers, media and peripherals are sufficient. WANs and some large LANs need some additional devices like a bridge, gateway or router to connect different small or large networks. A network needs a communication protocol. Microsoft Windows, Linux and other operating systems use TCP/IP. Apple Macintosh computers used Appletalk in the 20th century, but also use TCP/IP now.

ACTIVITY 01

(FIEB-SP/2016) In the fragment from the second paragraph – “These connections may allow access to the Internet, for example to show computers in a store...” – the word in bold indicates

- (A) need.
- (B) advisability.
- (C) request.
- (D) possibility.
- (E) permission.

ACTIVITY 02

(FIEB-SP/2016) Na frase do terceiro parágrafo (“A network must be connected with appropriate hardware”), a palavra em destaque expressa a ideia de

- (A) condição.
- (B) necessidade.
- (C) possibilidade.
- (D) opção.
- (E) capacidade.

ACTIVITY 03

(FIEB-SP/2016) In the sentence from the third paragraph (A network needs a communication protocol.) the word “needs” could be replaced, keeping the same sense of the text, by

- (A) must have.
- (B) may have.
- (C) could have.
- (D) would have.
- (E) can have.

ACTIVITY 04

Escolha a melhor alternativa para a pergunta a seguir.

Imagine que você está em sala de aula e precisa pedir para ir ao banheiro. Qual a melhor opção?

- (A) Can I go to the toilet, please?
- (B) Could I go to the toilet, please?
- (C) I may go to the toilet, please?
- (D) Would I go to the toilet, please?
- (E) I go to the toilet, please?
